

Maintenance Improvement Program

The Maintenance Improvement Program (MIP) ensures that initial and ongoing improvements are realised in the plant operations following the conduct of a Maintenance Operations Review or Audit:

Key Features:

- Step-by-step in-house facilitated and structured program
- Facilitated workshop to identify all current initiatives
- Input from all audits, reviews & benchmarking
- Actions prioritised on business impact
- Responsibilities assigned for "bite size" projects
- Ongoing coaching and mentoring to ensure progress
- Continuous Improvement culture established

Benefits

- Ensure initiatives from reviews are converted into real results
- Improvement projects coordinated, prioritised & scheduled
- Logical and structured approach
- New projects managed within business priorities
- Continuous Improvement culture established
- External facilitation ensures schedule imperatives are met

Implementation Management Program

The Implementation Management Program (IMP) ensures people skills and culture are developed concurrently with technical and organisational improvement projects.

Key Features:

- Collective determination of needs
- Bring staff along with new processes
- Increase staff independence and ownership
- Focussed coaching for all stakeholders
- Targeted training to meet the needs
- Continuous Improvement culture established

Benefits

- Ensures people skills in tune with new technology
- People skilled in parallel with technical implementation
- Builds understanding and ownership of improvement projects

The Implementation Management Program runs seamlessly in parallel with the Maintenance Improvement Program aimed at the technical and logistical aspects of improvement projects.
